## **COVID-19** PRIVACY BILL COMPARISON

		Democratic Plan (Public Health Emergency Privacy Act)	Republican Plan (COVID-19 Consumer Data Protection Act of 2020)	Cantwell/Cassidy
Definitions	Covered Entity	Any person (including government entity)-(i) that collects, uses or discloses emergency health data electronically or through communications by wire or radio; OR (ii) that develops or operates a website, web application, mobile application, mobile operating system feature, or smart device application for the purpose of tracking, screening, monitoring, contact tracing, or mitigation, or otherwise responding to the COVID-19 public health emergency.  EXCLUSIONS- (i) health care providers, (ii) de minimis collection or processing of emergency health data; (iii) service provider; (iv) a person acting in their individual or household capacity; or (v) a public health authority, (vi) HIPAA covered entities or business associates.	With respect to covered data, any entity or person that is (i) subject to FTC enforcement; or a (ii) common carrier or nonprofit organization that collects, processes, or transfers such data, or determines the means and purposes for the collection, processing, or transfer of covered data; and is not a service provider with respect to such data.	Operators of "automated exposure notification services" other than public health authority that are subject to the FTC Act, non profits or common carriers.  An "automated exposure notification service" is a website, online service, online application, mobile application, or mobile operating system that is offered in commerce in the United States and that is designed, in part or in full, specifically to be used for, or marketed for, the purpose of digitally notifying in an automated manner, an individual who may have become exposed to infectious disease (or the device of such individual, or a personal or entity that reviews such disclosures).
	Emergency Health Data/Covered Data	Means data linked or reasonably linkable to an individual or device, including data inferred or derived about the individual or device from other collected data provided such data is still linked or reasonably linkable to the individual or device, that concerns the public COVID-19 health emergency. Such data includes—  (A) information that reveals the past, present, or future physical or behavioral health or condition of, or provision of healthcare to, an individual, including— (i) data derived from the testing or examination of a body part or bodily substance, or a request for such testing; (ii) whether or not an individual contracted or been tested for, or an estimate of the likelihood that a particular individual may contract, such disease or disorder; and (iii) genetic data, biological samples, and biometrics; and (B) other data collected in conjunction with other emergency health data or for the purpose of tracking, screening, monitoring, contact tracing, or mitigation, or otherwise responding to the COVID-19 public health emergency, including— (i) geolocation data, when such term means data capable of determining the past or present precise physical location of an individual at a specific point in time, taking account of population densities, including cell-site location information, triangulation data derived from nearby wireless or radio frequency networks, and global positioning system data; (ii) proximity data, when such term means information that identifies or estimates the past or present physical proximity of one individual or device to an another, including information derived from Bluetooth, audio signatures, nearby wireless networks, and near-field communications; (iii) demographic data; (iv) contact information for identifiable individuals or a history of the individual's contacts over a period of time, such as an address book or call log; and (v) any other data collected from a personal device.	Precise geolocation data, proximity data, a persistent identifier, and personal health information to track the spread signs or symptoms of COVID-19, to measure compliance with social distancing or other COVID-19 requirements, or for contact tracing.  EXCLUSIONS— (i) Aggregated data (ii) Business contact information (iii) De-identified data (iv) Employee screening data (v) Publicly available information	Any information that is 1) linked or reasonably linkable to any individual or device linked or reasonably linkable to an individual; 2) not aggregate data; and 3) collected, processed, or transferred in connection with an automated exposure notification service.
Requirements	Purpose Limitation	Yes	Yes	Yes
	Accuracy Requirement	Yes	Yes	Yes
